Harvard Referencing

Referencing is the method used to ensure that other research influences are recognised within your assignment. Referencing includes two main parts:

- a citation within the text of your assignment
- a list of references at the end of your assignment

Why do I need to reference?

Correct referencing helps ensure that you avoid being accused of plagiarism. Most assignments during your time at the University of Wolverhampton will be assessed on the quality of your referencing which will count towards your grade. Referencing also ensures that you can demonstrate how your ideas build upon the research of others. If someone is reading your assignment, they should be able to use your referencing to find the sources you have used to help with your assignment. This is also useful when you read published sources - if you find an interesting source then the items on its reference list may be interesting too.

The University of Wolverhampton mainly supports the Harvard referencing system, but other systems do exist. Check with your Faculty for the one they recommend. Whichever style you use, it is important to be clear, consistent and correct, making sure you include all the relevant details.

Please note: this is standard guidance only – if your lecturer has different requirements, please follow their instructions.

Checklist of what to include for the most common information sources:

	Author	Year	Title of article	Title of publication	Issue	Place	Publisher	Edition	Page number(s)	URL	Date accessed

Referencing in your text

When you summarise, refer to, or quote from an author's work in your document, you need to acknowledge your source in the text. This is called an 'in-text citation'. When using Harvard, you do this by putting the author's name, and publication year. If the name of the author appears naturally in your sentence, only the year should be in brackets. If you use a direct quote the page number should also be included.

Examples:

Excellent study skills are fundamental to academic success (Cottrell, 2010)

or

Cottrell (2010) argues that excellent study skills are fundamental to academic success.

or

"The importance of academic skills should not be underestimated" (Cottrell, 2010, p.19)

In the reference list, you then put the full details of the reference to enable a reader to trace the source of the information that you have used:

Example: Cottrell, S. (2010) *Academic skills*. 2nd ed. London: Spon Press.

Long quotations

For long quotations of more than 4 lines, you should indent the quotation and there is no requirement for quotation marks.

In-text citation

Depending on how many authors there are for your source, the in-text citation would be as follows;

One Author	(Smith, 2015)	...Smith (2015) argues that...
Two Authors	(Smith and Jones, 2015)	...according to Smith and Jones (2015)....
Three Authors	(Smith, Jones and Brown, 2015)research by Smith, Jones and Brown (2015) showed that....
More than three Authors	(Smith <i>et al.</i> , 2015)	Smith <i>et al.</i> (2015) proved that....

In the reference list, all authors should be listed as shown below with surname/family name followed by the initial(s) of any given names.

Smith, E.J., Jones, E.S. and Brown, R.C. (2015) *Molecular neuropharmacology: a foundation for clinical neuroscience*. New York: McGraw-Hill.

Author rules

Organisation as author

If there is only an organisation's name on an item and no named individuals, use the organisation as the author.

Example: University of Wolverhampton (2014)...

Note: some organisations are also known by an abbreviation, for example the Royal College of Nursing (RCN). Give the full name the first time you use the organisation in your text and then use the abbreviation for the citation and any later mentions.

Example: Information from the Royal College of Nursing (RCN, 2016) suggests...

Author has published 2 or more items in the same year

If two or more documents are by the exact same author(s) in the same year, add lower-case letters after the year (a, b, c, etc.) to distinguish between them in your text and in your reference list. The first of the sources you mention in your essay would be a, the next b and so on.

Example:

Morris (1999a) concludes that... additionally Morris (1999b) states....

Multiple sources for same idea

You can group together sources that talk about the same point by listing them within the same in-text citation. Use semi-colons ; to separate each item. List by year with oldest first.

Example: A number of reports (Smith, 2008; Jones, 2009; Brown, 2011; Williams *et al.*, 2013; Thomas and Lewis, 2014) revealed that....

Secondary referencing (authors quoting other authors)

Sometimes you may want to reference an author who is quoting another information source that you haven't seen. You should try to find the original source, but if that is not possible, you need to make it clear that you have not seen the original source yourself.

Within your text, you cite the original author, followed by the author of the secondary source.

Examples:

"It will not require violence to succeed, and it cannot be successfully resisted by violence" (Reich, 1971, in Singer, 1997, p.90).

Reich (1971, in Singer, 1997, p.90) stated that "it will not require violence to succeed, and it cannot be successfully resisted by violence".

In your reference list at the end, you list the book you actually saw:

Singer, P. (1997) *How are we to live?* Oxford: Oxford University Press.

5.

Author/date missing

Ideally you should only reference sources where the author and date information is clearly available but there may be times where this information is missing. In such instances, make sure that the source would still be considered reliable enough to use in an academic assignment.

If there isn't an author (named individuals or organisation) given, use the title (in italics) for your citation and at the start of your main reference. For example;
(*Oxford English Dictionary*, 1989)
Oxford English Dictionary (1989) 2nd ed. Oxford: Clarendon Press.

If no date of publication can be identified, use (no date) for the citation and in your main reference.

Example:

(University Hospitals Birmingham NHS Trust, no date)
University Hospitals Birmingham NHS Trust (no date) *Privacy and dignity* [online].
[Accessed 12 April 2017]. Available at: <www.uhb.nhs.uk/privacy-and-dignity.htm>.

Reference list entries

Each citation in your text leads the reader to the full information about the item in your reference list.

Each item in your reference list should only appear once, regardless of how many in-text citations you have for that item.

Your list should be completed in alphabetical order by author's surname regardless of the format of the information source. See [page 31](#) for an example of a completed reference list.

Reference list or bibliography?

A reference list is a list of all the information sources that you have cited in your text. A bibliography is a list of items that you have read, and that have informed your thinking, but not specifically cited in your assignment. Check the requirements for each module with your tutor.

PDFs.

Many online documents are in a pdf format. They should not be referenced as a pdf but according to their document type e.g. a journal or book.

References deconstructed: Books

All of the information for your reference can be found on the copyright page of the book (normally 2 or 3 pages into the book). The place of publication is the town or city rather than the county or country. If there are multiple publication places give the most local, with a UK town over an international one; if only international locations are listed, use the first place mentioned. If it is a town in the USA – list the town and the state initials, e.g. Hoboken, NJ.
