Project Purpose and Challenged Addressed

Project Purpose

The purpose of the project is to strengthen and deepen collaboration between the UoW and PUA so as:

1. To develop a TNE civil engineering course.
2. To develop a TNE civil engineering course for an apprenticeship degree based on teaching practise in the UK.
3. To develop a collaborative research programme (projects and publications).

Challenges Addressed

The project will address the following challenges:

1. The need to emphasise the importance of using different teaching approaches (such as blended learning) in the apprenticeship programme.
2. Prioritising the promotion of courses and the development of a business partnership with PUA for future collaboration, including research.
3. During the Project the following items relating to UoW's business model will be discussed: Promoting UoW's civil engineering courses so that they can be delivered in Egypt via either direct delivery (by UoW) or by PUA, who will adapt our courses and deliver them in Egypt. This will generate income for services provided by UoW.
