

UNIVERSITY OF
WOLVERHAMPTON

Early Years CPD opportunity at the University of Wolverhampton

We are delighted to be able to offer a series of CPD sessions for those working with young children in a wide range of settings including, voluntary, private sector and schools. Each of these sessions will provide an opportunity to explore best practice and give delegates practical skills and strategies to enhance the provision for those in their care.

Working within the framework of the EYFS each session will explore how the role of the adult, the environment and the choice of activities contributes towards improved outcomes. Delegates will leave with an enhanced understanding of best practice and with a host of practical ideas they can immediately implement.

While each session can be attended as a stand-alone CPD session they will complement each other for more holistic CPD. For this reason those booking three sessions will qualify for a discount on the 4th session.

Enhancing social and emotional development (Wednesday 22nd May 6pm – 8pm)

Ensuring positive relationships between children and adults and children and their peers is fundamental to successful early years. A range of strategies that help children to enhance their self-esteem and recognise and respond to their emotions will be shared. The importance of play will be emphasised in this session.

Early language (Wednesday 12th June 6pm – 8pm)

Language acquisition does not come by chance. Every interaction in the early years can be used to develop early language when practitioners consciously focus on it. The environment, activities and adults have a major role to play in developing language; in this session we will also focus on how peer-to-peer interactions can be maximised.

Phonics (Wednesday 26th June 6pm – 8pm)

A structured approach to teaching phonics is of course essential in all aspects of EYFS. This session will explore the key ideas in teaching phonics and how they can be enhanced in interactions with children throughout the day – whichever scheme is being utilised.

Developing early mathematics (Wednesday 10th July 6pm – 8pm)

Focussing on number this session will enhance practitioners confidence in helping children to master the key skills of recognising and understanding number, counting and mathematical thinking, indoors and out.

The cost is **£30 per session**
or **£100 for all four sessions**
