

# Impact Module

## Introduction to the Impact Module

The Impact module can be found on your Elements homepage.

Impact can broadly be thought of as an opportunity to make a change – to individuals, to certain groups, to a way of thinking or a way of working, and can be measured in terms of REACH (the people who will benefit) and SIGNIFICANCE (what the change will be).

Consider

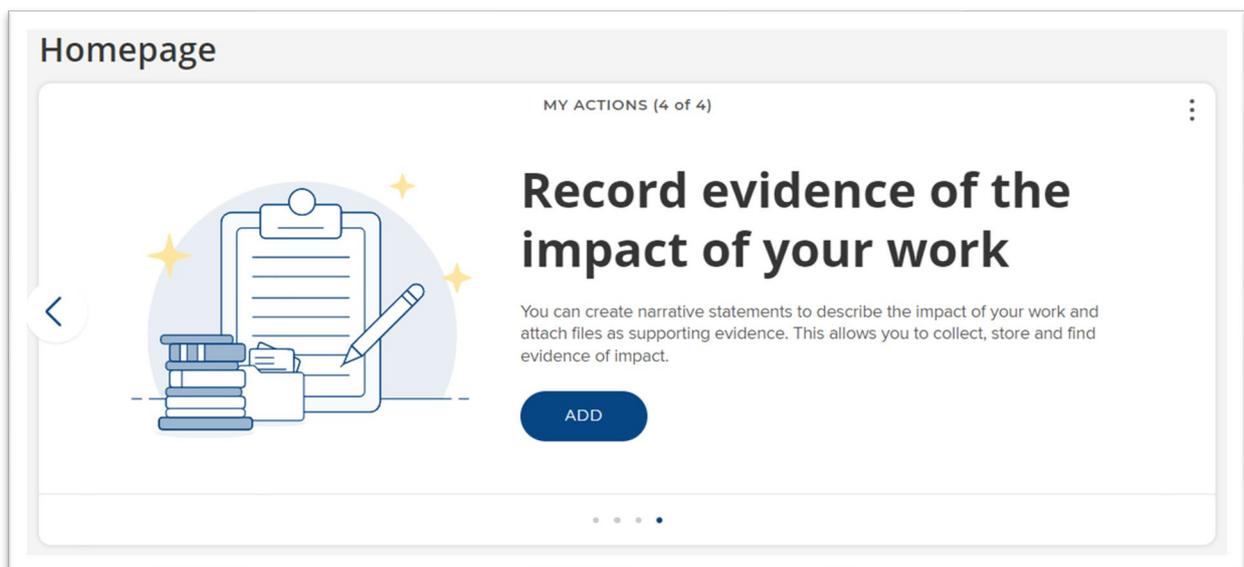

- WHO is ultimately going to benefit from your research activity,
- or WHAT change will it make?
- and HOW will this change take place? (i.e. will stakeholders be attending these events to learn from you?).
- Also think about HOW the change can be tracked, measured and evidenced.

Examples could include: evidencing the need for changes in policy which lead to structures and practices which reduce exclusion of community groups; activity to recognise the relevance of an artistic practice on social engagement leading to a wider uptake of regional cultural activities; the development of a new product or process which has a beneficial effect on industry; artistic activity and mentorship leading to the sharing of skills and the creation of new works; or activities which encourage wider participation in education.

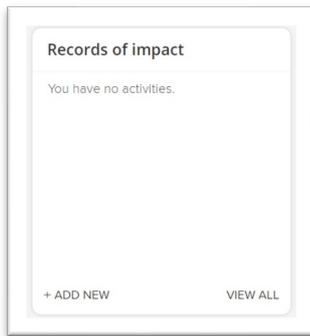

Elements allows activity to be logged, linked with other users, and evidence to be attached to the record, building up a picture of how your research has had benefit outside of academia.

## Adding Impact

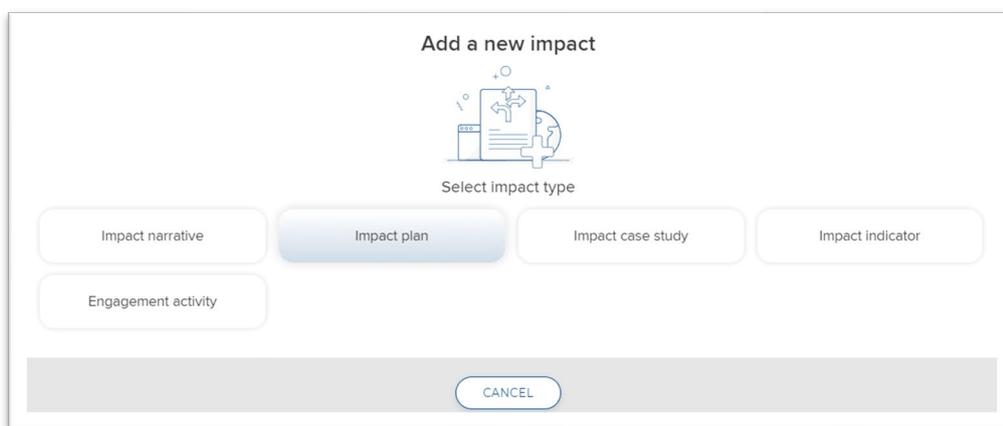

There are two ways that you can add impact to your profile. You may see the 'record evidence of the impact of your work' appear in the Action log as shown below. You can click on add impact to start the impact workflow.

Alternatively, you can add records of impact by visiting your homepage and clicking on +add New in the **Records of Impact** box.

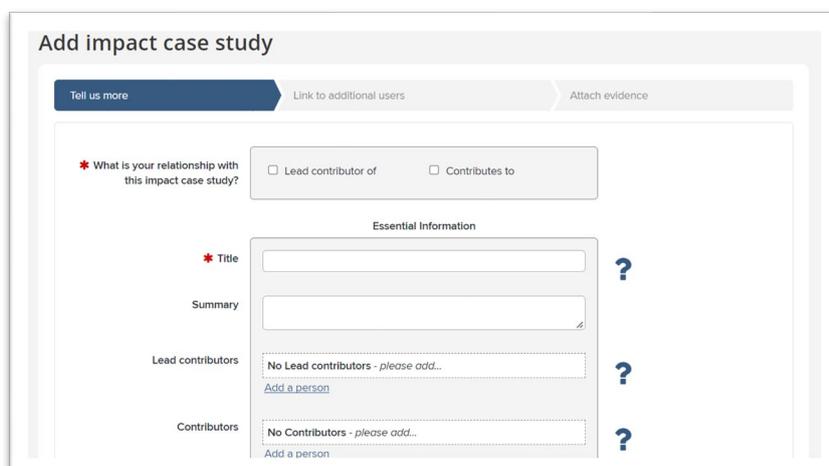

Once selecting +add, you will need to choose the Impact Type.

You will then be presented in a form for you to complete. Please note all sections with a red asterisk must be completed otherwise the record will not save.

Tips for completing the form;

- When entering text into the Narrative of Events, after each record you create remember to click on the +add button to add your entry.
- When adding External Contributors, remember to click the +add button after each contributor, else you won't be able to save your record of impact.
- Remember to click the blue save button at the bottom of the form to proceed to the next step.

## Linking users

The next step is to link users that are associated with this impact. You may have a large list here so best to use the Filter at the side and enter the last name of the person you wish to link to your impact. This will result in the impact being also shown on the other user's profile.

When you have found the user you want to link to your impact, you need to click the box next to their picture to select them and then click on **link selected** and choose the relationship the user has with your impact.

The screenshot shows the 'Elements Impact' interface. At the top, there are three steps: 'Tell us more', 'Link to additional users' (which is the active step), and 'Attach evidence'. A progress indicator shows '1 filter has been set.' with a 'Reset filters' link. Below this, there is a section titled 'Link users to this impact' with instructions: 'Use the filters to search for users to associate with this impact. Once selected, you can use the dropdown on the Link Selected button to select which type of relationship should be created.' There is a 'Sort by:' dropdown set to 'Last name (A to Z)'. A search filter is applied with the name 'barfield'. Below the search area, there are buttons for 'Unselect all on page', 'Link Selected' (with a dropdown arrow), 'Unlink Selected' (with a dropdown arrow), and 'Done'. A list of users is shown below, with one user selected: 'BARFIELD, James' (Admin). The user's name is highlighted, and there is a checkmark in a box next to their profile picture. Below the list, it says '1-1 of 1'.

You will then see the relationship listed next to their name.

Once you have finished linking users click the done button to go to the next step.

The next step is to attach some evidence, Elements offers three ways of evidencing records of impact. These are attaching a document, provide a link or add contact details.

The screenshot shows the 'Attach evidence' interface. At the top, there are three steps: 'Tell us more', 'Link to additional users', and 'Attach evidence' (which is the active step). Below this, there is a section titled 'Elements Impact'. Underneath, there is a heading 'Add new evidence:' followed by three buttons: 'Attach a document' (with a document icon), 'Provide a link' (with a link icon), and 'Add contact details' (with a person icon). A 'Done' button is located at the bottom right of the interface.

To attach a document complete the below fields and remember to click save. If you need some guidance on what to include in the text boxes, you can hover over the blue question marks.

The screenshot shows a web form titled "Attach a document" with a close button (X) in the top right corner. The form is divided into three main sections:

- \* File:** A text input field with a "Choose file" button and the text "No file chosen".
- Date of testimonial:** A date picker input field with a calendar icon.
- Nature of evidence:** A large, empty text area for providing details.

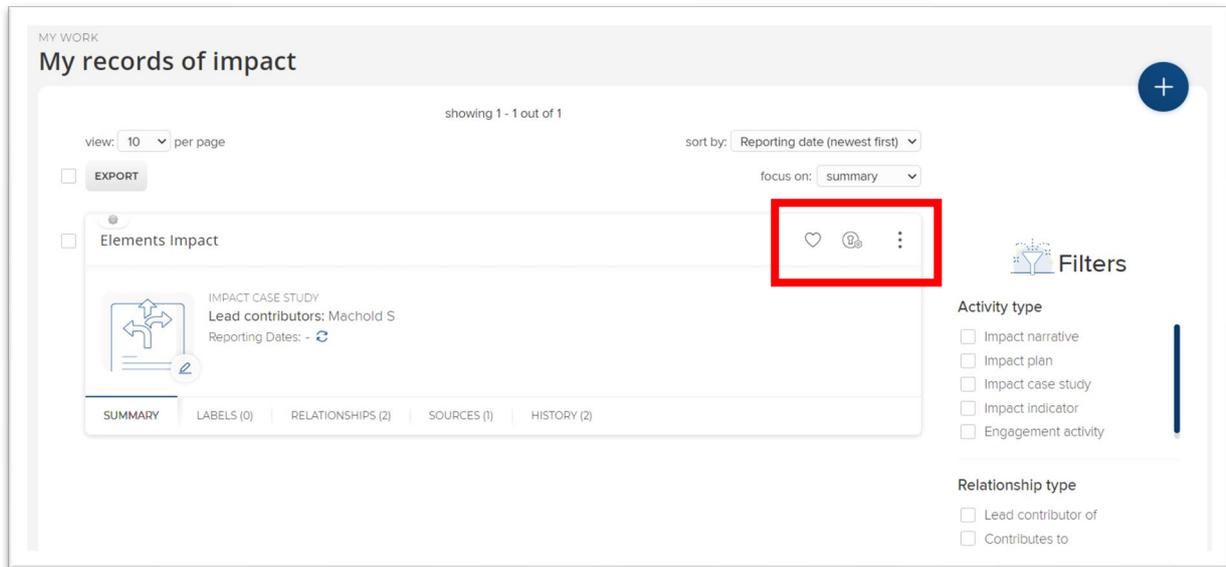

At the bottom of the form, there are two buttons: "Cancel" and "Save" (which is highlighted with a dashed border). To the right of the form, there are two blue question marks. In the bottom right corner of the overall interface, there is a blue "Done" button.

If you wish to provide a link in addition or instead of an attached document, you will need to complete the below fields, alternatively you can also add contact details by completing the below fields.

When you have completed submitting your supporting evidence click the blue **Done** button.

## Viewing Records of Impact

If you want to review your records of impact, scroll down on the homepage and then click on **Records of Impact**. You will be presented with a list of your impact records.

As per the other modules within Elements, you will see the action area. Clicking the 3 dots reveals more options.

- The **heart** is to mark the impact activity as a favourite. This will appear at the top of your Elements profile within the Impact section.
- The **Globe** icon is to hide it from your profile. You will be able to see it, but other Elements users won't be able to view it.
- Click **View details** to view the full details of the impact activity.
- **Add to workspace**. This is usually used if you are joining together or splitting records.
- **Remove relationship** will disassociate yourself with the item (delete it from your profile).

## Editing Records of Impact

If you want to edit a record of impact, to add further evidence or some more narrative. Click on the impact you wish to edit by selecting the title.

ID: 274A3318-8386-407F-B152-09D648E3DFC0

Title	Elements Impact
Summary	Impact of System Change
Lead contributors	<a href="#">Machold, Silke</a>

### Supporting evidence

Editing Your Profile.pdf 

Manage evidence

Click on the edit record button to add a narrative of events. Alternatively to add more supporting evidence click on the **Manage evidence** button. You can also link other users to this record of impact in the links section as displayed below. Remember when searching for another elements user, always enter surname first.
